

A decorative border surrounds the central text. It features a horizontal bar at the top and bottom, and vertical bars on the left and right. Each corner is adorned with a stylized yellow flower with a brown center. In the center of the page, a soft, multi-colored rainbow arches across the background.

AGENT WHO WILL BE PLEASED TO SUPPLY
YOU WITH COMPLETE COLOR CARD.

Introduction

THE painting or decorating of your home is of considerable importance. The attractiveness and durability, or the lack of these two essentials, depend very largely on the thought given to the matter before the work is started.

The architecture of the building to be painted and its surroundings require special thought in order to permit of the selection of colors that will give individuality to the home.

Our Service Department will gladly go into detail and furnish specifications, or suggestions, complete. A photograph or description of your home and its surroundings will enable us to recommend to you a combination of colors which will prove particularly adaptable to the local conditions.

The following pages contain reproductions of houses painted with Sun-Proof to convey some idea of the possibilities, but a reference to our complete color card will enable you to select many desirable combinations.

Color Scheme No. 1.

For Specifications See Opposite Page

Velumina

THE IDEAL FLAT WALL PAINT

For interior decoration where the modern flat finish is desired.
Can be washed, is durable, sanitary and economical.

Patton's Sun-Proof Paints

Sixty years' experience in the manufacture of paints, guided always by the fundamental principles of making only the best paint, is your guaranty that every sealed package with our trade-mark is insurance of quality. Modern methods, modern machinery, expert supervision, experienced labor, and a rigid rule to manufacture only according to standard formulæ is the real basis for the best paint made — Patton's Sun-Proof.

Color Scheme No. 2.

For Specifications See Opposite Page

Patton's Porchite

FOR PORCH FLOORS, BOAT DECKS, ETC.

Porch floors are subjected to most severe conditions, and to give service, a paint for this purpose must be tough and elastic to resist all the elements.

Color Scheme No. 2.

Body—Sun-Proof.....	332
Trim—Sun-Proof.....	341

Olive Drab	
Ceiling—Sun-	
Proof	332

Patton's Sun-Proof Paints

Remember, the cost of application is twice that of the material. Therefore, the true and accurate way to figure the cost of painting your home is by the covering capacity and length of service.

Good paint will wear from two to three times longer than cheap material, thereby avoiding the necessity of repainting for the maximum of time, eliminating the greatest expense, which is the cost of application.

Color Scheme No. 3.

For Specifications See Opposite Page

Patton's Princess Floor Paint

TOUGH AND ELASTIC

Paint for this purpose must dry quickly for convenience,
and exceptionally hard to resist wear and tear.

Color Scheme No. 3.

Body	{ First Story—Sun-Proof	340
	{ Second Story—Sun-Proof	320
Trim—Sun-Proof		314
Sash—Sun-Proof		341
Shingles—Roof Tor-On Shingle Stain		343
Porch	{ Floor—Porchite Maltese Blue	
	{ Ceiling—Sun-Proof	55

Patton's Sun-Proof Paints

Good paints cannot be made from inferior raw materials. Every particle of raw material that enters into the manufacture of Sun-Proof Paint is carefully tested and analyzed in our completely equipped laboratory before being used, and this precaution of using only the best materials is supplemented by our system of careful weighing and measuring, according to accurate standard formulæ, insuring paint that is uniform in quality, color and covering capacity.

Color Scheme No. 4.

For Specifications See Opposite Page

Patton's Carriage, Wagon, Implement Paint

A VARNISH PAINT FOR EXTERIOR USE

Colors are "fast to light," ground in durable exterior varnish.
Suitable for Vehicles and Implements of all kinds.

{ Olive Drab	
{ Ceiling—Sun-	
{ Proof	179

Patton's Sun-Proof Paints

It is a recognized fact that the lumber used for building purposes today is vastly inferior to the lumber of twenty years ago, and this emphasizes the necessity for avoiding inferior paints. While Patton's Trade-Mark is a guaranty of the highest quality, the analyses which we show on the label of every can of SUN-PROOF is conclusive evidence of the contents.

Insist on Patton's SUN-PROOF and you will be sure of not only a satisfactory job, but an economical one as well.

Color Scheme No. 5.

For Specifications See Opposite Page

Patton's Auto Gloss Finish

SUPERFINE EXTERIOR COLORED VARNISHES

For high-grade work where a permanent high-class finish is essential.
Especially suited for Automobiles, Carriages, Porch and Lawn Furniture, etc.

Color Scheme No. 5.

Body—Sun-Proof.....	302
Trim—Sun-Proof.....	331
Sash—Sun-Proof.....	333
Shingles—Tor-On Shingle	
Stain.....	342
Porch { Floor—Porchite	
Maltese Blue	
Ceiling—Sun-	
Proof.....	179

Patton's Sun-Proof Paints

Paint not only enhances the value of property by giving it a more attractive appearance, but at the same time is actual insurance against loss which must naturally follow when the lumber is not sufficiently protected against the elements. Loss by decay, while not as rapid as by fire, is nevertheless just as sure.

Painting is essential. Good paint is necessary for good results. Insist upon Patton's trade-marked packages with the analyses thereon.

Care in the Application of Paint

Lumber should be perfectly dry. Never paint in damp or frosty weather.

Never use or allow the use of ochre as a primer.

Never permit the use of adulterated paint. It is expensive and good results cannot be expected.

Do not flow on, but brush the paint in well, thoroughly filling all cracks and crevices. Briefly: "Use elbow grease."

If the surface has been previously painted and is chipped or blistered, the old paint should be carefully removed by burning or scraping.

NEVER TRY TO MAKE ONE COAT DO WHERE TWO OR THREE ARE NEEDED.

It is false economy.

Always remember that labor is two-thirds of your entire expense, so insist upon the best paint—**SUN-PROOF**, and have it well applied.

TO ESTIMATE QUANTITY REQUIRED

To ascertain quantities of paint needed for a job:

Add the length of both sides, for example	30 ft.
	30 ft.
Add the length of both ends, for example.....	25 ft.
	25 ft.
	110 ft.
Multiply by average height, for example.....	20 ft.
	2200 ft.

Divide by 330 square feet, the covering capacity of a gallon of Sun-Proof, two coats. This will give you the number of gallons required ($6\frac{2}{3}$ gallons).

(All Patton Packages Full U. S. Measure.)

SPECIAL PAINTS FOR ALL PURPOSES

Velumina

A perfect, washable, flat paint for walls and ceilings. No surfaceer required. Only two coats needed for new walls.

Princess Floor Paint

For interior use only. Extremely durable and economical.

Porchite

For porch floors, boat decks, and where a hard, tough and elastic paint is required. For exterior use.

Tor-On Shingle Stain

A preservative stain permitting of most artistic decorative effects.

Gloss Interior Enamel Finish

A moderate priced enamel for every household use.

Carriage, Wagon and Implement Paint

As the name indicates, this is a gloss paint for vehicles and exterior use where a durable finish is desired.

Auto Gloss Finish

Exterior wearing colored Varnishes. For best work of every description.

Sunbright Metal Polish

Will not soil hands or clothing. Quickly polishes brass, nickel, copper or tin. Put up in convenient screw-top cans.

Stovepipe Enamel

An air-drying enamel that will stand great heat. Splendid for all kinds of metal work where a bright jet black finish is desired.

Roof, Barn and Warehouse Paint

A paint that will wear on roof or siding—attractive colors ready to apply and very economical
